

About Us

Mission

The Math in Common Community of Practice offers the time, tools, and expertise for education leaders to work together, in and across districts, to advance student success in mathematics.

Vision

All Math in Common districts are achieving their visions of student success in mathematics.

Ten school districts in California have been awarded significant support from the S.D. Bechtel, Jr. Foundation to help the transition to the Common Core State Standards for Math (CCSS-M) in grades K-8. These districts will become leaders in the statewide transition to the CCSS-M and participate in a learning community where they share plans, lessons learned, and tolls with other grantee districts and statewide.
