OBJECTIVES

Objectives:

- Incorporate the research/data aspect of Practical Measures into our ongoing cycles.
- Focus on Closure and Amplifying student voice

This is the second semester cycle for teacher leaders. In the first semester, teacher leaders collaboratively planned a task, video-taped themselves teaching it, and then administered the practical measures to analyze data in their math departments. The teacher leaders will repeat this cycle this semester. Underlying this semester is a look towards sustainability and action research.
